

IMPORTANT OCCUPATIONAL HEALTH & SAFETY NOTICE

WHY TEST & TAG

Numerous accidents occur each year due to shocks from faulty or misused electrical equipment. The introduction of the ANZ/NZS 3760:2003 is to ensure that employers and employees are meeting their obligations to legislation covering OH&S, and thus reducing the risk of such incidents and their legal and financial consequences. The MattElectric complete Legislative Compliance Management System program ensures the efficient management of your company's obligations to your employee's safety and current legislation with the minimum of complexity.

WHY MattElectric?

- Complete Legislative Compliance Management System (LSMStm)
- Electronic & Hardcopy Compliance Register System
